## PART 1

|                                                                                                                                                                                                       | Communication | Page |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|------|
| Correlations between Yield, Girth and Bark Thickness of RRIM Clone Trials. <i>Ong Seng Huat</i> .. .. .                                                                                               | 677           | 1    |
| Ultrastructure of Mineral Deficient Leaves of <i>Hevea</i> III. Quantitative Considerations. <i>Samsidar bte Hamzah and J.B. Gomez</i> .. ..                                                          | 679           | 15   |
| Residual Effect of Monosodium Methane Arsenate on Soyabean, Groundnut and Maize. <i>Mohd Hidzir bin Kadir, E. Pushparajah and S.P. Wong</i> .. .. .                                                   | 680           | 24   |
| Studies on Nitrogen in Malaysian Soils I. Native Fixed Ammonium Nitrogen. <i>Tan Keh Huat</i> .. .. .                                                                                                 | 681           | 34   |
| Viability Test on <i>Hevea</i> Seeds by the Tetrazolium Method. <i>Sakhibun bin Mohamad Husin, H.F. Chin and Y.L. Hor</i> .. .. .                                                                     | 683           | 44   |
| Thesis Summaries:                                                                                                                                                                                     |               |      |
| Crosslinking of Polyisoprenes by Difunctional Azocarboxylic Esters. <i>Mustapha bin Ngah</i> .. .. .                                                                                                  |               | 52   |
| The Symbiosis between <i>Rhizobium</i> -Leguminous Plants: the Effectiveness, Competitiveness and Introduction of Strains of <i>Rhizobium meliloti</i> in the Soil. <i>Faizah Abdul Wahab</i> .. .. . |               | 53   |
| Technical and Allocative Efficiency in Malaysian Rubber Small-holdings: a Production Function Approach. <i>Abdullah bin Sepien</i> .. .. .                                                            |               | 54   |
| Book Review:                                                                                                                                                                                          |               |      |
| Soil Erosion and Conservation in Peninsular Malaysia. <i>Prof Dr Ir M. De Boodt</i> .. .. .                                                                                                           |               | 55   |

## PART 2

|                                                                                                                                                                                       |     |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| Long-term Ethephon Stimulation I. Effects of Continuous Ethephon Stimulation with Half-spiral Alternate Daily Tapping. <i>S. Sivakumaran, S.W. Pakianathan and J.B. Gomez</i> .. .. . | 682 | 57 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|

|                                                                                                                                            | Communication | Page |
|--------------------------------------------------------------------------------------------------------------------------------------------|---------------|------|
| Anatomy of Bark Renewal in Normal Puncture Tapped Trees. <i>Samsidar bte Hamzah and J.B. Gomez</i> .. .. .                                 | 684           | 86   |
| Ozonolysis as a Means to Study Putative Groups on the Polyisoprene Molecule. <i>Abdul Azis bin Ariffin</i> .. .. .                         | 685           | 96   |
| Fruit and Seed Development in <i>Hevea</i> (Clone RRIM 600) in Malaysia. <i>Sakhibun bin Mohamad Husin, H.F. Chin and Y.L. Hor</i> .. .. . | 686           | 101  |
| Quebrachitol Synthesis in <i>Hevea brasiliensis</i> . <i>F.J. Bealing</i> .. .. .                                                          | 688           | 111  |

#### Thesis Summaries:

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| Canopy Modification and its Effect on the Growth and Yield of <i>Hevea brasiliensis</i> Muell. Arg. <i>Leong Wing</i> .. .. . | 123 |
| Soil Genesis on the Coastal Plain of Perak (Peninsular Malaysia). <i>Noordin Wan Daud</i> .. .. .                             | 123 |
| The Role of Carbohydrates in the Exploitation and Latex Flow of <i>Hevea</i> . <i>Chong Fee-Chon</i> .. .. .                  | 125 |

#### PART 3

|                                                                                                                                                 |     |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----|
| Reaction of Cold Aqueous N-bromosuccinimide with Natural Rubber. <i>See Toh Mook Sang</i> .. .. .                                               | 687 | 127 |
| Tyre Bead Unseating Test. <i>K. Muniandy and Loh Pang Chai</i> .. .. .                                                                          | 689 | 138 |
| Reaction of Dithiocarbamyl Compounds with Copper in Latex. <i>Ng Chiew Sum</i> .. .. .                                                          | 690 | 146 |
| Some Factors Influencing Tack Properties of Monoclonal Latices. <i>Wong Sean Giap and Lau Chee Mun</i> .. .. .                                  | 694 | 155 |
| Factors Controlling Phosphate Fixation and Release in Selected Soils under Rubber Cultivation. <i>Abu Talib bin Bachik and L. Baert</i> .. .. . | 695 | 163 |

#### Thesis Summaries:

|                                                                                           |     |
|-------------------------------------------------------------------------------------------|-----|
| Drying of Natural Rubber in Particulate Form. <i>S. Sethu</i> .. .. .                     | 171 |
| Phosphate and Iron Interactions with Clays and Soils. <i>Abu Talib bin Bachik</i> .. .. . | 171 |

## AUTHOR INDEX

The number of each Part is indicated in bold.

Abu Talib bin Bachik           **3** 171  
 Abu Talib bin Bachik and Baert, L.           **3** 163  
 Abdul Azis bin Ariffin           **2** 96  
 Abdullah bin Sepien           **1** 54

Baert, L. *see* Abu Talib bin Bachik  
 Bealing, F.J.           **2** 111  
 Boodt, M. De           **1** 55

Chin, H.F. *see* Sakhibun bin Mohamad Husin  
 Chong Fee-Chon           **2** 125

Faizah Abdul Wahab           **1** 53

Gomez, J.B. *see* Samsidar bte Hamzah  
 Gomez, J.B. *see also* Sivakumaran, S.

Hor, Y.L. *see* Sakhibun bin Mohamad Husin

Lau Chee Mun *see* Wong Sean Giap  
 Leong Wing           **2** 123  
 Loh Pang Chai *see* Muniandy, K.

Mohd. Hidzir bin Kadir, Pushparajah, E. and Wong, S.P.           **1** 24  
 Muniandy, K. and Loh Pang Chai           **3** 138  
 Mustapha bin Ngah           **1** 52

Ng Chiew Sum           **3** 146  
 Noordin Wan Daud           **2** 123

Ong Seng Huat           **1** 1

Pakianathan, S.W. *see* Sivakumaran, S.  
 Pushparajah, E. *see* Mohd Hidzir bin Kadir

Sakhibun bin Mohamad Husin, Chin, H.F. and Hor, Y.L.           **1** 44,           **2** 101  
 Samsidar bte Hamzah and Gomez, J.B.           **1** 15,           **2** 86  
 See Toh Mook Sang           **3** 127  
 Sethu, S.           **3** 171

## SUBJECT INDEX

Titles of papers are given in *italics*.  
The number of each Part is indicated in **bold**.

- Acer pseudoplatanus*                    **2** 112
- Acid ammonium oxalate single extraction of phosphate                    **3** 164
- Adenine triphosphate                    **1** 32
- Adenosine                    **3** 127
- Alditols                    **2** 115
- Ammonia
  - effect of probe tack of latex films                    **3** 157
- Ammonium lactate method                    **3** 173
- Ammonium laurate
  - effect on probe tack of latex film                    **3** 159
- Ammonium nitrogen                    **1** 34
- Ammonium sulphate                    **1** 25
- Amyl alcohol                    **3** 149
- Anatomy of Bark Renewal in Normal Puncture Tapped Trees*                    **2** 86
- Arabitrol                    **2** 115
- Arachis hypogaea* L.
  - effect of arsenic residues on                    **1** 24
- Arsenic
  - effect on crop                    **1** 29
  - toxicity                    **1** 25
  - uptake by plants                    **1** 30
- Artemisia*                    **2** 121
- Artemisia vulgaris*                    **2** 111
- Azocarboxylic esters                    **1** 52
- Ba-133 isotopic exchange method                    **3** 164
- Bark bursts                    **2** 87
- Bark renewal
  - process of                    **2** 88
  - structure                    **2** 87
- Bark starch content                    **2** 125
- Bark thickness measurements                    **1** 4, 5
- Barkometer                    **1** 2
- Basalt                    **1** 39
- Bast tissue                    **2** 86
- Beidellite                    **2** 124
- Bisazo compounds, synthesis of                    **1** 52
- Book Review*                    **1** 55
